

360a Secondary Distribution Box

AI Overview

The 360A Secondary Distribution Box, such as the Mersen MPDB67523, safely splits primary power into multiple secondary circuits for branch distribution.

Overview

A 360A Secondary Distribution Box (SDB) is designed to receive high-current power from a main distribution source and distribute it safely to multiple secondary circuits. It is commonly used in industrial and commercial electrical systems to manage power flow efficiently and provide a central junction for branch circuits .

Mersen MPDB67523 Features

The Mersen MPDB67523 is a 360A-rated power distribution block that exemplifies a secondary distribution solution:

- Current Rating: 360 amperes, suitable for high-power applications .
- Poles: 3-pole configuration, allowing multiple primary connections .
- Material: Tin-plated aluminum, providing corrosion resistance and reliable conductivity .
- Certifications: UL and CSA approved, meeting UL508A and National Electrical Code® spacing requirements for feeder and branch circuits .
- Flexibility: Optional adder poles allow customization of primary and secondary wire combinations, supporting up to 30 secondary outputs .
- Operating Temperature: Maximum 80°C, suitable for standard industrial environments .
