

Connecting the fiber optic launcher to the router

AI Overview

To connect a fiber optic line to your router, you must first link the fiber cable to an Optical Network Terminal (ONT) and then connect the ONT to your router via Ethernet.

Required Equipment

- Optical Network Terminal (ONT): Converts the fiber optic signal into an electrical signal your router can use .
- Fiber optic cable: Usually single-mode with SC/APC or SC/UPC connectors .
- Ethernet cable: Typically Cat6a or higher for optimal speeds .
- Compatible router: Ensure it has a WAN or SFP port capable of handling fiber input .

Step-by-Step Connection

- Locate the fiber wall outlet where your ISP's fiber line enters your home .
- Connect the fiber optic cable to the ONT: Remove protective caps, align the connector key, and insert until it clicks securely . Handle the fiber carefully to avoid dirt or damage.
- Power on the ONT: Wait 2-5 minutes for the status lights to stabilize, indicating a successful connection to the ISP network .
- Connect the ONT to the router: Use an Ethernet cable from the ONT's LAN/Ethernet port to the router's WAN port .
