

Dustproof and waterproof outdoor power distribution box

AI Overview

Outdoor power distribution boxes commonly feature an IP65 rating, meaning they are fully dustproof and protected against water jets from any direction.

Understanding IP Ratings

The IP (Ingress Protection) rating is an international standard that defines the level of protection an enclosure provides against solids and liquids. It consists of two digits:

- First digit (0-6): Indicates protection against solid objects, including dust. A rating of 6 means the enclosure is completely dust-tight, preventing any dust ingress.
- Second digit (0-9): Indicates protection against water. A rating of 5 means the enclosure is protected against water jets from any direction, suitable for outdoor exposure but not for full immersion .

IP65 Outdoor Distribution Boxes

Outdoor power distribution boxes with an IP65 rating are designed to withstand harsh environmental conditions:

- Dustproof: Fully prevents dust from entering, ensuring internal electrical components remain clean and functional .
