

Guangte Fiber Optic Distribution Frame

AI Overview

The Guangte Fiber Optic Distribution Frame (ODF) is a high-quality unit designed for organizing, terminating, and interconnecting fiber optic cables, manufactured by Shanghai Guangte Communication Technology.

Overview

The Guangte Fiber Optic Distribution Frame (ODF) is a dedicated enclosure that integrates fiber splicing, patching, and cable routing in a single structure, providing protection for sensitive connectors and splices from mechanical stress and contamination. It is suitable for both small-scale and large-scale fiber optic deployments, including residential networks, offices, central offices, and main distribution rooms. The ODF ensures network reliability by minimizing signal loss and accidental damage.

Features

- Durable and modular design: Many Guangte ODFs are rack-mounted or wall-mounted, offering scalability and easy fiber management.
- High fiber capacity: Supports multiple fiber terminations, making it suitable for FTTH (Fiber to the Home) and ODN (Optical Distribution Network) applications.
- Compatibility: Works with Guangte's range of fiber optic products, including patch cords, pigtails, PLC splitters, FBT couplers, adapters, and attenuators.
- OEM/ODM support: Guangte provides customized solutions to meet specific network requirements.
