

How much does 4-core fiber optic cable cost per kilometer

AI Overview

The cost of 4-core fiber optic cable per kilometer typically ranges from \$1,000 to \$3,000 for the cable itself, with total installed costs ranging from \$12,000 to \$90,000 depending on installation method and terrain.

Cable Material Costs

The raw 4-core fiber optic cable generally costs \$1,000 to \$3,000 per kilometer, depending on whether it is single-mode or multi-mode, armored or non-armored, and the quality of the protective sheathing and glass cores. Single-mode fiber is more expensive than multi-mode due to its higher bandwidth and longer transmission distance capabilities. Armored cables designed for harsh environments cost more than non-armored cables used in less demanding conditions.

Installation Costs

Installation costs can significantly increase the total per-kilometer price. Factors include:

- Terrain and method: Aerial installation on utility poles is cheaper, while underground trenching or ducting in urban areas is more expensive.
- Urban density: Dense urban areas require permits, traffic management, and road restoration, which can push costs toward the high end of the range.
