

How to connect the fiber optic gateway panel

Overview

First, connect the SC/APC connector of a single-mode fiber optic cable to the PON port on the rear panel of the gateway. Compatible router: Verify that your router supports fiber optic input (look for an SFP or WAN port labeled). To set up your gateway for the first time, ensure you have the X5001 gateway, power cord, SC/UPC fiber-optic cable, and provisioned Internet access. Connect a Coax cable from the wall jack to the side of the Splitter (Coax In) with a single port. Network Interface Device (NID): A box where the internet service meets your home's wiring. This comprehensive guide combines industry standards with field-tested practices to ensure you achieve a rock-solid.
