

How to disassemble the cable management module

AI Overview

Disassembling a cable management module requires careful handling, proper tools, and following step-by-step instructions specific to the system type.

General Safety Precautions

- Wear gloves to protect your hands from sharp edges or corners during disassembly .
- Handle glass or delicate panels carefully to avoid breakage or injury .
- Lay the system flat on a stable surface to prevent parts from falling during removal .

Desktop Chassis (e.g., ProArt PA602)

- Remove side panels carefully, especially if made of glass .
- Unscrew the cable cover by removing screws on the upper and lower sides.
- Open the cable box on the side and remove all cables inside.
- Detach mounts and Velcro straps by squeezing inward to release latches .
- After these steps, the cable management module is fully disassembled and ready for maintenance or replacement.
