

How to set up a repeater on a fiber optic router

AI Overview

You can extend your fiber optic router's Wi-Fi coverage by connecting a repeater either via Ethernet or wirelessly, then configuring it to pair with your main network.

Step 1: Prepare the Repeater

- Reset the repeater to factory settings by holding the reset or connect button for 10-15 seconds until the status LED indicates a reset .
- Note the default Wi-Fi network name and password printed on the device or in the manual .

Step 2: Connect to the Fiber Optic Router

- Wired setup (recommended for stability): Connect one end of an Ethernet cable to the LAN port of your fiber optic modem or router and the other end to the repeater's LAN port .
- Wireless setup: Place the repeater within 10-15 feet of the router during setup to ensure a strong signal .

Step 3: Power On and Pair

- Plug the repeater into a power outlet and wait for the status LED to indicate it is ready .
- Using WPS: Press the WPS button on the router and then on the repeater to pair automatically .
