

Installing QSFP28 optical network switches in Australia

AI Overview

QSFP28 modules enable 100 Gbps connectivity and can be installed hot-swappable into compatible switches, with local Australian suppliers providing standards-compliant transceivers and support.

Overview of QSFP28 Modules

QSFP28 (Quad Small Form-factor Pluggable 28) modules are 100 Gbps optical transceivers that aggregate four 25 Gbps channels in a single module. They are hot-swappable, allowing insertion or removal without powering down the switch, and are widely used in data centers, enterprise backbones, and metro networks . QSFP28 modules come in different types based on reach and fiber:

- SR4: Short-reach, 850 nm multimode fiber, MPO-12 connector, up to 70 m (OM3) / 100 m (OM4) – ideal for leaf-spine and ToR aggregation .
- LR4: Long-reach, 1310 nm single-mode fiber, LC duplex, up to 10 km – suitable for campus backbone and metro interconnects .
- DR: Single-lambda PAM4, 1310 nm, LC duplex, up to 500 m on single-mode fiber with FEC – for high-density short metro links .

Installation Guidelines

- Check Compatibility: Ensure the QSFP28 module is supported by your switch model and firmware version. Vendors like Extreme Networks, HPE Aruba, Cisco, and FS provide compatibility lists .
