

Price List for Enclosed Metal Cable Trays

AI Overview

Metal enclosed cable trays typically range from \$50 to \$300 per meter, depending on size, material, and duty rating.

Overview

Metal enclosed cable trays are designed to fully protect electrical cables from physical damage, dust, water, and accidental contact, making them ideal for industrial, commercial, and high-rise residential applications . They are usually made from steel or pre-galvanized steel, with options for hot-dipped galvanization to enhance corrosion resistance . Enclosed trays differ from open trays by providing a hole-free, fully enclosed pathway, which increases safety and cable longevity .

Factors Affecting Price

- **Material and Finish:**
 - Pre-galvanized steel is generally less expensive than hot-dipped galvanized steel.
 - Stainless steel or powder-coated finishes increase cost due to durability and corrosion resistance.
- **Tray Size and Duty Rating:**
 - Widths range from 50mm to 600mm, and lengths are typically 1m or 3m .
 - Light-duty trays are cheaper, while medium and heavy-duty trays designed for industrial loads cost more.
- **Accessories and Installation Components:**
 - Couplers, bends, tees, risers, and lids add to the total cost .
 - Wall brackets, cantilever arms, and support systems are additional expenses.
