

Price of Empty Fiber Optic Panel Box

AI Overview

Empty fiber optic panel boxes typically range from \$20 to \$150 depending on size, slots, and construction.

Overview

Empty or blank fiber optic panel boxes, also known as fiber patch panels or termination boxes, are used to organize and protect fiber optic cables while maintaining proper bend radius and network accessibility . They come in various styles, including swing-out, slide-out, and fixed enclosures, and can accommodate different numbers of adapter panels or LGX cassettes . Common sizes include 1U, 2U, and 3U, with slot capacities ranging from 12 to 288 fibers .

Price Range

- Small 1U blank panels (holding 12–24 fibers) generally cost \$20–\$50. These are suitable for small network racks or single applications .
- Medium panels (24–48 fibers, 1U–2U) typically range from \$50–\$100, offering more flexibility for growing networks .
- Large panels (3U, 12-slot or 288-fiber capacity) can cost \$100–\$150 or more, especially when constructed from 16-gauge steel with heavy-duty support arms for stability .

Considerations

- Material and durability: Steel panels are more robust and often slightly more expensive.
