

Price of small lights in distribution boxes

AI Overview

Small indicator lights for distribution boxes typically cost between \$2 and \$10 per unit, depending on voltage, color, and supplier.

Overview

Small indicator lights, often used in distribution boxes to show system status, are available in 12V, 24V, and 110/120V versions and come in multiple colors such as green, yellow, and red for easy visual identification of operational states. These lights are usually 16mm in diameter, compact, and suitable for mounting in panels, machines, or distribution boxes. They are designed for long life and energy efficiency, often with dustproof bases for durability in industrial environments.

Price Range

- Individual LED indicator lights: Typically \$2-\$5 per unit for standard 16mm industrial LEDs with basic voltage options (12V-120V) and single-color configurations.
- Multi-color packs: Sets of 6 (2 green, 2 yellow, 2 red) are available for around \$8-\$10, providing a cost-effective solution for multiple installations.
- Specialized or high-durability models: Lights with enhanced features such as higher IP ratings, longer lifespan, or industrial-grade components may cost \$10 or more per unit.

Suppliers and Sources

- Online retailers like Amazon and TradeSparky offer a variety of small indicator lights suitable for distribution boxes.
