

Radio and Television Signal Optical Power Meter

Overview

Optical Power Meters are vital tools for measuring the power of optical signals in fiber optic networks. They are commonly used during installation, maintenance, and troubleshooting to ensure that signal strength remains within operational thresholds. Radasun delivers the most satisfying products and services to the customers all over the world, with our own brands name, and also provides OEM and ODM for the most famous brands in the field. Coax splitters and combiners are used to split or combine (mix) CATV signals so that they can be used for more than one device two-way, four-way, eight-way, sixteen-way, 1x12, 1x24 -. Hexylon is a high-performance portable meter intended for professional users who need advanced features and high measurement accuracy. Introducing the next-generation TV EXPLORER, now with native 4K support, DVB-T2, ISDB-T/Tb and optionally ATSC 3.
