

Secondary power distribution box with inner door

Overview

Secondary distribution boxes, also known as sub-distribution boxes, generally serve specific power supply areas. These boxes have inner and outer doors, powder-coated exteriors, and are designed for safety and aesthetic appeal, with rainproof tops for outdoor work. SR2 enclosures is a complete range of monobloc structures for the construction of small and medium-sized electrical panels, for control and command or small distribution applications. They are particularly used in on-board machine panels, boiler room switchboards, and pump control and in any. JXF control box is suitable for three-phase three-wire, three-phase four-wire, three-phase five-wire systems with 50Hz, 500V and below, and load current not greater than 250A. Today, electrical systems are essential for homes and industries. Many feeders leave substation in a concrete ducts and are routed to a nearby pole.
