

Self-operated network security cabinets

Overview

IPS (Information Processing System) Security Containers are a cost effective alternative to a CAA or facility/SCIF build out, allowing on-line, closed-door, unattended, 24/7 operation of stand-alone or networked classified applications. The IPS Container is an armored computer cabinet constructed. Explore self-contained racks at Server Racks Online, designed to provide a complete solution for housing and managing IT, server, and network equipment. These racks feature built-in cooling systems, power distribution, and noise reduction, making them ideal for offices, data centers, and AV setups. Shop durable network cabinets built from cold-rolled steel. Secure your IT and AV equipment with lockable glass doors and side panels. Network cabinets are enclosed systems designed to securely store, organize, and protect networking and IT equipment such as switches, routers, patch panels, servers, power strips, and cable management components.
