

Should I upgrade my fiber optic connection and replace my router

Overview

Yes, you can often use your existing router with fiber optic internet, but there are crucial considerations. Understanding compatibility, potential limitations, and when an upgrade is necessary will ensure you get the most out of your high-speed connection. Routers designed for DSL (which uses phone line inputs) or cable (which uses coaxial inputs) won't work. This guide will break down everything you. Making the switch to fiber internet offers a significant upgrade in speed and reliability, but understanding the equipment requirements can feel overwhelming. Why Replace Your ISP's Router or Modem?
