

Tighten the fiber optic cable around the pole head

Overview

Using the appropriate tools, gradually tighten the FTTH cable clamp around the fiber optic cable. After tightening, perform a gentle tug test to confirm that the cable is firmly. This blog post will guide you through a detailed, step by step process of installing a drop wire clamp for fiber optic cables. Before commencing the installation, it's vital to gather all the necessary tools and materials. They help you secure, support, and tension overhead cables while protecting them from slipping and environmental damage. It is assumed that the reader is. When laying loops of fiber on a surface during a pull, use "figure-8" loops to prevent twisting the cable. 2 Never look directly into the end of a fiber that may be carrying laser light. Consequently, serious damage to the.
