

# Turkmenistan Fiber Optic Sensor Supplier

## AI Overview

While Turkmenistan does not appear to have domestic optical fiber sensor manufacturers, several international companies supply advanced fiber optic sensing solutions to the country.

### Key International Suppliers

Opsens Solutions – A division of Opsens Inc., Opsens develops and manufactures fiber optic sensors for industries including oil & gas, aerospace, civil engineering, and geotechnical applications. Their OTG-A fiber optic temperature sensor is recognized for high performance and reliability, suitable for industrial and research applications .

GKER Photonics Co., Ltd. – Offers a wide range of fiber sensing solutions for temperature, strain, and pressure monitoring. Their products are designed for industrial monitoring, oil and gas exploration, structural health monitoring, and environmental sensing. GKER provides distributed sensing systems and customized solutions for real-time data analysis .

AP Sensing – Specializes in distributed optical sensing technologies, including distributed temperature sensing (DTS), distributed acoustic sensing (DAS), and distributed vibration sensing (DVS). Their systems are widely used for pipeline monitoring, infrastructure security, and industrial applications .

Sintela – A global leader in distributed fiber optic sensing (DFOS), Sintela offers ONYX™ systems for strain, temperature, and acoustic monitoring. Their solutions are applied in mining, pipelines, railways, and border security, providing high sensitivity and reliability .

OZ Optics Ltd. – Based in Canada, OZ Optics supplies fiber optic components, test equipment, and sensor systems for remote monitoring of pipelines, bridges, dams, and security fences. They provide both standard and custom fiber optic sensor solutions .
