

Vanuatu 685nm Laser Diode Reference Price

AI Overview

685nm laser diodes typically range from \$10 to \$500 USD depending on power, mode, and packaging, with higher-power or specialized modules costing more.

Price Overview

- Low-power single-mode diodes (1-50mW): Approximately \$10-\$50 USD per unit from suppliers like Alibaba and Civil Laser . These are suitable for basic lab experiments or small OEM applications.
- Medium-power diodes (50-200mW): Prices generally range from \$50-\$150 USD, often with TEM00 beam quality and compact packaging .
- High-power diodes and laser modules (500mW-7W): These can cost \$200-\$500 USD or more, depending on output power, cooling requirements, and whether they are fiber-coupled or include a complete laser system . Custom OEM modules may increase the price further.

Factors Affecting Price

- Output Power: Higher wattage diodes are significantly more expensive.
- Beam Mode: Single-mode diodes are generally pricier than multi-mode due to better beam quality.
- Packaging: Fiber-coupled or integrated modules with power supplies cost more than bare diodes.
