

Warning signs for construction site electrical distribution boxes

Overview

Temporary power poles, generator farms, and transformer boxes are common on large sites. The Requirement: OSHA requires that all electrical equipment areas be guarded to prevent accidental contact. Access points to these areas must be marked with “ DANGER: High Voltage “. Construction electrical signs are visual warning devices used to identify temporary power sources, live circuits, and underground or overhead utilities. Unlike permanent facility signs, these must often be weather-resistant and versatile enough to move as the job progresses. Designed for maximum visibility, compliance, and long-lasting performance, these signs clearly communicate the presence of high voltage, shock risks, and other electrical dangers. By. The Danger Distribution Board Sign provides a clear and highly visible warning of electrical hazards around distribution boards, switchboards, and fuse boxes. Featuring the internationally recognised high voltage hazard symbol, this sign is fully compliant with ISO 7010 standards and helps to. The National Fire Protection Association's (NFPA) 79 standard requires enclosures that do not clearly show that they contain electrical devices to be marked with a safety sign in accordance with the ANSI Z535 standards.
